PETER MULLER

Berkeley, CA | (510) 646-2187 | peterianmuller@gmail.com
https://www.linkedin.com/in/peterianmuller/ | https://github.com/peterianmuller

TECHNICAL SKILLS

Languages	Javascript (ES6), HTML5, CSS3, SQL	**Frameworks**	React, Redux, Angular, Node.js,
Databases	PostgreSQL, MySQL, MongoDB,		Express, Mocha, Chai
	Sequelize, Mongoose, Firebase	**Libraries**	jQuery, Underscore, Lodash, Bootstrap,
Tools	Git, Babel, Webpack, NPM		D3.js

PROFESSIONAL EXPERIENCE

Hack Reactor, *Software Engineer Fellow*   San Francisco, CA
- Provided technical guidance for future engineers on fundamental JavaScript principles   July 2017 - April 2018
- Collaborated with Mission Bit to create pathways for 'limited access' students to connect with technology professionals
- Developed original forward-thinking curriculum on objects, recursion, and higher-order functions

EDeeU, *Software Engineer (Contract)*   Berkeley, CA
- Built mobile-web UI with responsive design using CSS media queries and flexbox   July 2017 - August 2017
- Implemented conditional rendering for EDeeU's file upload component for optimized UX
- Integrated UX refactor with React, Redux, and Firebase for data management

Towns and Cities, *Co-Founder and Chief Content Producer*   Brooklyn, NY
- Wrote a hip-hop curriculum for English language learners   April 2012 - April 2015
- Engineered music on Ableton Live and increased standardized test scores to 95% pass rate
- Daily testing with students and use by classroom teachers and private instructors in the US, UK, and Spain

The LIFESTYLE Arts Collective, *Co-Founder and Front-End Developer*   Madrid, Spain & Brooklyn, NY
- Leveraged custom responsive CSS and HTML to render complex multimedia files   August 2012 - August 2013
- Drove outreach to feature 60+ interviews with artists from over 20 countries

SOFTWARE PROJECTS

NBATables: Basketball Data Visualization, *Software Engineer*   Summer 2018
- Leveraged Express middleware to query and parse specific player data endpoints from the NBA stats API
- Integrated responsive data visualization of player statistics using D3.js graphs

Artificial Intelligence Module Website, *Software Engineer*   Summer 2018
- Implemented cross-browser CSS3 3D logo animation algorithm with multiple placements on pages
- Provided secure serving of page via HTTPS by updating in URL routing in .htaccess file

Vineyard: Analytics for Vineyard Systems, *Software Engineer*   Winter 2017
- Redux refactor to isolate components and make data flow more succinct throughout the application
- Integrated real-time weather info via Weather Underground API to compliment Vineyard data entry
- Implemented Google Maps API to enrich data with geolocation

vocabSaver: A tool for enhancing vocabulary, *Software Engineer*
Autumn 2016
- Enabled user data to persist by incorporating a MongoDb database into application architecture
- Utilized xml2js middleware to parse xml response from Merriam-Webster Dictionary API

EDUCATION

Hack Reactor   San Francisco, CA
- Advanced Software Engineering Program   March 2017

University of Washington   Seattle, WA
- BA in International Studies   March 2011

INTERESTS

- Music-maker and software engineer continuously iterating over the perfect running playlist
